Assembly Instructions

normann

C O P E N H A G E N

1

Indhold:

Samleinstruktion:

1.

Soklen 'knipses' sammen til en 7-kantet cylinder med den matte side udad.

2.

De 7 skærmelementer mærket "2" foldes som vist. Ombøj forsigtigt der hvor skærmelementet buer.

"Snipperne" bøjes ind, så den matte side vender udad.

2

3.

Skærmelementet haspes på den smalle del af åbningen på sokkelementet.

Vend sokkelementet på hovedet og før 'snipperne' igennem hullerne og ombøj 'snipperne' på bagsiden så modulet er låst.

4.

Sæt næste skærmelement på soklen ved siden af de første og fortsæt sådan til alle 7 skærmelementer "2" er monteret. Husk at låse modulerne på indersiden af soklen.

5.

Tag ringelementet mærket "S" og ombøj forstærkningskanterne. Saml ringelementet ved hjælp af 'snipperne'.

6.

Monter ringelementet "S" på 'snipperne', der sidder på skærmelementet og lås dem ved at rette "snipperne" ud.

3

Ringelementet korrekt fastmonteret.

Fold de 7 skærmelementer mærket "1". Ombøj forsigtigt hvor skærmelementet buer. Monter første skærmelement på ringelementet ved at stikke 'snipperne' igennem hullet, hvor de andre 'snipper' også sidder.

Monter resten af skærmelementerne på samme måde hele vejen rundt. Husk at låse modulerne på bagsiden.

Bøj og saml bundmodulet. Sørg for at samlingen vender indad.

Monter bundmodulet i slidserne på de inderste skærmelementer. (Slidserne er de små hakker).

Færdigmonteret bundmodul.

Bøj ophængsmodulet i de 6 led og saml det omkring ledningerne, så det har form som et 7-kantet kræmmerhus.

Vend lampen om så åbningen i lampens top vender opad. Sænk ophængsmodulet ned i åbningen og stik 'snipperne' igennem hullerne. Bøj forstærkningskanterne ned i vandret, så det låser ophængsmodulet.

Færdigmonteret lampe klar til ophængning. Lampen kan hænges op uden at afmontere lampefatning. Udskiftning af pære kan nemt foretages gennem lampens fleksible bund.

4

Innehåll:

Monteringsinstruktioner:

1.

Sätt ihop basen till en 7-sidig cylinder med den matta sidan utåt.

2.

Vik de 7 lampskärmsenheterna markerade med "2" som visat. Vik försiktigt längs med skärmenhetens kurva.

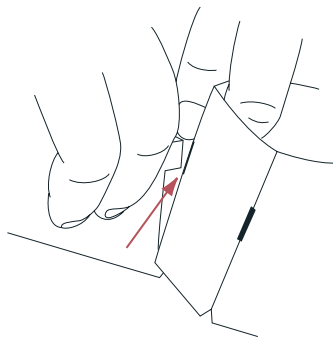

Vik in flikarna med den matta sidan utåt.

5

3.

Haka fast skärmenheten till den smala delen av basenhetens öppning.

Vänd basenheten upp och ned och för flikarna genom hålen. Vik över dem på baksidan för att låsa modulen.

4.

Placera nästa skärmenhet på basen intill det första och fortsätt tills alla 7 lampskärmsenheter markerade med "2" har monterats. Kom ihåg att låsa modulerna på basens insida.

5.

Ta ringenheten markerad med "S" och vik över de stärkande kanterna. Montera ringenheten genom att använda flikarna.

6.

Montera ringenheten "S" på flikarna på lampskärmsenheten och lås dem genom att rätta ut flikarna.

6

Korrekt monterad ringenhet.

Vik de 7 lampskärmsenheterna markerade med "1". Vik försiktigt över längs med skärmenhetens kurva. Montera den första skärmenheten på ringenheten genom att föra flikarna genom hålet där de andra flikarna också är lokaliserade.

Montera resten av lampskärmsenheterna på liknande sätt hela vägen runt. Kom ihåg att låsa modulerna på baksidan.

Böj och montera basmodulen. Säkerställ att skarvarna är vända inåt.

Fäst basmodulen i springorna på de inre lampskärmsenheterna. (Springorna är de små utskurna hålen.)

Den färdigmonterade basmodulen.

Böj upphängningsmodulen i de 6 riktningarna och montera runt vajrarna så att de formar en 7-sidig kon.

Vrid runt lampan så att öppningen på lampans topp vänds uppåt. Sänk upphängningsmodulen in i öppningen och för flikarna genom hålen. Vik ned de stärkande kanten horisontalt så att de låser upphängningsmodulen.

Den färdigmonterade lampan är redo att hängas upp. Lampan kan hängas upp utan att ta bort lamparmaturen. Glödlampor kan enkelt bytas genom lampans flexibla bas.

MAX 40 WATT

7

Innhold:

Monteringsinstruksjoner:

1.

Klikk grunnelementene sammen i en sylinder med sju sider, med den matte siden ut.

2.

Brett de sju lampeskjermelementene merket 2, som vist. Brett forsiktig langs buen på skjermelementet.

Brett inn "vingene", slik at den matte siden vender ut.

8

3.

Hekt skjermelementet på den smale delen av åpningen på grunnelementet.

Snu grunnelementet opp-ned og før vingene gjennom hullene, brett dem over baksiden slik at modulen låses.

4.

Sett det neste skjermelementet på grunn-elementet ved siden av det første, og fortsett til alle sju lampeskjermelementene, nr. 2. er festet. Husk å låse modulene på innsiden av grunnelementet.

5.

Ta ringelementet merket S og brett forsterkningskantene over. Monter ringelementet ved hjelp av "vingene".

6.

Sett ringelementet S på "vingene" på lampeskjermelementet, og lås dem ved å rette ut "vingene".

9

Riktig montert ringelement

Brett de sju lampeskjermelementene merket 1. Brett forsiktig over langs buen på skjermelementet. Fest det første skjermelementet på ringelementet ved å skyve "vingene" gjennom hullet, der de andre "vingene" også er festet.

Fest resterende lampeskjermelementer på samme måte, hele veien rundt. Husk å låse modulene på baksiden.

Bøy og monter grunnmodulen. Pass på at skjøtene vender innover.

Fest grunnmodulen i slissene på de innerste lampeskjermelementene. (Slissene er små utsparinger.)

Den ferdigmonterte grunnmodulen.

Bøy opphengingsmodulen i de seks retningene og monter den rundt ledningene slik at den former en kjele med sju sider.

Drei lampen slik at åpningen øverst i lampen vender opp. Før opphengingsmodulen ned i åpningen og skyv "vingene" gjennom hullene. Brett ned forsterkningskantene vannrett slik at de låser opphengingsmodulen.

Den ferdigmonterte lampen klar til opphenging. Lampen kan henges opp uten at lyspærefestet fjernes. Det er enkelt å skifte pære takket være den fleksible lampesokkelen.

MAKS. 40 WATT

10

Contents:

1 base element

7 lampshade elements no. 2

7 lampshade elements no. 1

1 ring element S

1 base module

1 suspension module

Assembly instructions:

1.

'Snap' the base together into a 7-sided cylinder with the matt side out.

2.

Fold the 7 lampshade elements marked '2' as shown. Fold carefully along the curve of the shade element.

Fold the 'flaps' in with the matt side out.

11

3.

Hook the shade element onto the narrow part of the opening on the base element.

Turn the base element upside down and guide the 'flaps' through the holes, folding them over at the back to lock the module.

4.

Place the next shade element onto the base next to the first one and continue until all 7 lampshade elements '2' have been mounted. Remember to lock the modules on the inside of the base.

5.

Take the ring element marked 'S' and fold the strengthening edges over. Assemble the ring element using the 'flaps'.

6.

Mount ring element 'S' onto the 'flaps' on the lampshade element and lock them by straightening out the 'flaps'.

12

Correctly mounted ring element.

Fold the 7 lampshade elements marked 'I'. Fold over carefully along the curve of the shade element. Mount the first shade element onto the ring element by pushing the 'flaps' through the hole where the other 'flaps' are also located.

Mount the rest of the lampshade elements similarly all the way round. Remember to lock the modules at the back.

Bend and assemble the base module. Make sure joints turn inwards.

Fit the base module into the slots on the inner lampshade elements. (The slots are the small cut-outs).

The fully assembled base module.

Bend the suspension module in the 6 directions and assemble around the wires so as to form a 7-sided cone.

Turn the lamp around so the opening at the top of the lamp is turned upwards. Lower the suspension module into the opening and push the 'flaps' through the holes. Turn down the strengthening edges horizontally so they lock the suspension module.

The fully assembled lamp ready for hanging. The lamp can be hung without removing the light fitting. Bulbs can be easily changed through the flexible base of the lamp.

MAX 40 WATT

13

Inhalt:

1 Sockelelement

7 Lampenschirmelemente
Nr. 2

7 Lampenschirmelemente
Nr. 1

1 Ringelement S

1 Mittelteil

1 Befestigungsteil

Montageanleitung:

1.

Knipsen Sie die Sockelelement so zusammen, dass ein 7-seitiger Zylinder entsteht, die matte Seite nach außen.

2.

14

3.

Haken Sie das Schirmelement an der engeren Öffnung des Sockelelements ein.

Wenden Sie das Ganze. Führen Sie die Laschen durch die Schlitzze und knicken Sie sie hinten um, um das Schirmelement zu fixieren.

4.

Befestigen Sie das nächste Schirmelement neben dem ersten, und tun Sie dasselbe mit den restlichen Lampenschirmelementen Nr. 2. Vergessen Sie nicht, die Elemente auf der Innenseite des Sockelelements zu fixieren.

5.

Nehmen Sie das Ringelement S und knicken Sie die Kanten zur Verstärkung nach innen. Setzen Sie den Ring mit Hilfe der Laschen zusammen.

6.

Setzen Sie das Ringelement S auf die dafür vorgesehenen Laschen auf den Lampenschirmelementen und fixieren Sie es, indem Sie die Laschen auseinanderfalten.

15

Korrekt aufgesetztes Ringelement.

Falten Sie die 7 Lampenschirmelemente Nr. 1. Falten Sie vorsichtig entlang der Rundung des Schirmelements. Setzen Sie das erste Schirmelement Nr. 1 auf das Ringelement, indem Sie die Laschen durch den selben Schlitz führen, wie diejenigen des Schirmelements Nr. 2.

Tun Sie rundherum das selbe mit den restlichen Lampenschirmelementen Nr. 1. Vergessen Sie nicht, die Elemente hinten zu fixieren.

Formen Sie das Mittelteil und setzen Sie es zusammen. Achten Sie darauf, die Verbindungen nach innen zu wenden.

Befestigen Sie das Mittelteil in den Steckschlitz auf der Innenseite der Lampenschirmelemente. (in den kleinen Einschnitten).

Das vollständig befestigte Mittelteil.

Formen Sie das Befestigungsteil und setzen Sie es so um das Kabel zusammen, dass ein 7-seitiger Kegel entsteht.

Wenden Sie die Lampe so, dass ihre obere Öffnung nach oben zu liegen kommt. Senken Sie das Befestigungsteil in die Öffnung und führen Sie die Laschen durch die Schlitzze. Knicken Sie die Kanten zur Stärkung horizontal, damit sie das Befestigungsteil fixieren.

Die vollständig montierte Leuchte bereit zum Aufhängen. Die Leuchte kann aufgehängt werden, ohne dass der Beleuchtungskörper entfernt werden muss. Dank des flexiblen Sockelelements können Glühlampen einfach ausgetauscht werden.

MAX. 40 WATT

16

Contenu :

1 socle

7 abats-jour n°2

7 abats-jour n°1

1 anneau S

1 module de base

1 module de suspension

Instructions d'assemblage :

1.

Enclenchez la base dans le cylindre heptagonal avec le côté mat vers l'extérieur.

2.

Pliez les 7 abats-jour comportant le chiffre '2', tel que cela est indiqué. Pliez soigneusement le long de la courbe de l'abat-jour.

Pliez les rabats avec le côté mat vers l'extérieur.

17

3.

Accrochez l'abat-jour sur la partie étroite de l'ouverture du socle.

Tournez le socle dans l'autre sens et insérez les rabats dans les trous, en les pliant à l'arrière pour verrouiller le module.

4.

Placez l'abat-jour suivant sur le socle suivant et continuez jusqu'à fixation des 7 abats-jour comportant le chiffre '2'. Veillez à verrouiller les modules à l'intérieur de la base.

5.

Prenez l'anneau comportant la lettre 'S' et repliez les bords renforcés. Assemblez l'anneau à l'aide des rabats.

6.

Montez l'anneau 'S' sur les rabats de l'abat-jour et verrouillez-les en redressant les rabats.

18

Anneau correctement monté.

Pliez les 7 abats-jour comportant le chiffre '1'. Pliez soigneusement le long de la courbe de l'abat-jour. Montez le premier abat-jour sur l'anneau en insérant les rabats dans le trou où se trouvent les autres rabats.

Montez le reste des abats-jour en procédant de la même manière. Veillez à verrouiller les modules à l'arrière.

Pliez et assemblez le module de base. Assurez-vous que les joints sont tournés vers l'intérieur.

Fixez le module de base dans les fentes des abats-jour internes. (Les fentes sont de petites entailles).

Le module de base assemblé.

Pliez le module de suspension dans les 6 directions et assemblez autour du fil de façon à former un cône heptagonal.

Tournez la lampe de façon à ce que l'ouverture au sommet de la lampe soit tournée vers le haut. Baissez le module de suspension dans l'ouverture et passez les rabats dans les trous. Rabaissez les bords renforcés horizontalement de façon à ce qu'ils soient fixés au module de suspension.

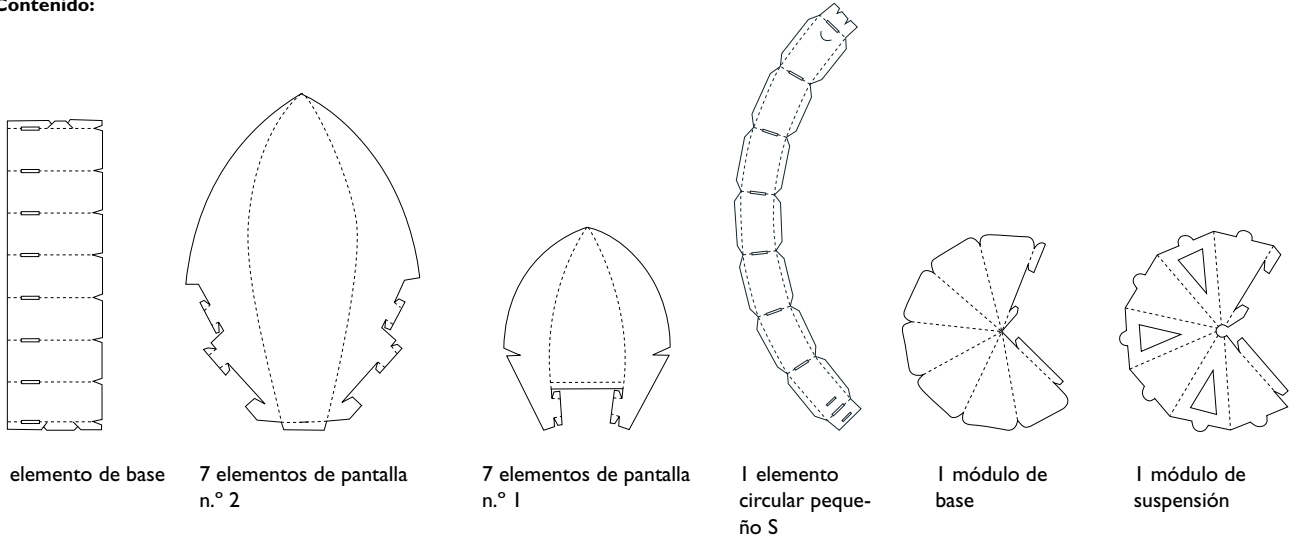

La lampe assemblée peut maintenant être accrochée. La lampe peut être accrochée sans retirer l'ampoule. Les ampoules peuvent être facilement remplacées grâce à la base flexible de la lampe.

MAX 40 WATTS

19

Contenido:

Instrucciones de montaje:

1.

Cierre la base con el lado mate hacia afuera formando un cilindro de siete lados.

2.

20

3.

Enganche el elemento de pantalla a la parte estrecha de la abertura del elemento de base.

Ponga el elemento de base boca abajo, haga pasar las pestañas por los agujeros y dóblelas sobre la parte posterior para sujetar el módulo.

4.

Coloque el siguiente elemento de la pantalla sobre la base, junto al primero, y continúe hasta haber montado los siete elementos marcados con el número 2. No olvide sujetar los módulos por el lado interior de la base.

5.

Sujete el elemento circular marcado como S y doble sobre sí mismos los bordes de refuerzo. Monte el elemento circular usando las pestañas.

6.

Monte el elemento circular S sobre las pestañas del elemento de pantalla y sujételos enderezando las pestañas.

21

7. El elemento circular montado correctamente.

8. Pliegue los siete elementos de pantalla marcados con el número 1. Realice la operación con cuidado de seguir la curva del elemento de pantalla. Monte el primer elemento de la pantalla sobre el elemento circular haciendo pasar las pestañas por el agujero en el que también están las otras pestañas.

Monte el resto de los elementos de la pantalla a su alrededor. No olvide sujetar los módulos en la parte posterior.

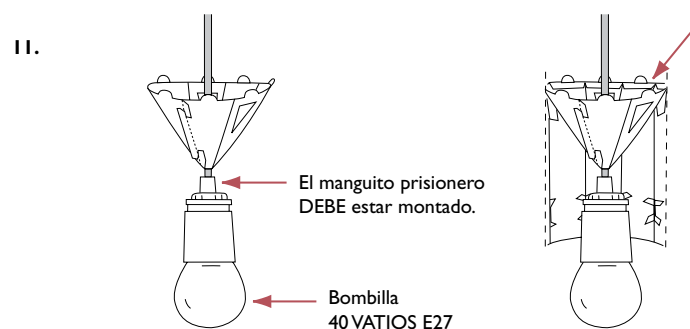

9. Doble y monte el módulo de base. Las uniones deben girarse hacia adentro.

10. Coloque el módulo de base en las ranuras (cortes pequeños) de los elementos interiores de la pantalla.

El módulo de base totalmente montado.

11. Pliegue el módulo de suspensión en las seis direcciones y móntelo alrededor de los alambres para formar un cono de siete lados.

Dé la vuelta a la lámpara para que la abertura de la parte superior mire hacia arriba. Baje el módulo de suspensión por la abertura y empuje las pestañas por los agujeros. Vuelva los bordes de refuerzo en horizontal para que sujeten el módulo de suspensión.

La lámpara terminada de montar, lista para colgarla. La lámpara puede colgarse sin necesidad de quitar el portalámparas. Las bombillas pueden cambiarse con facilidad a través de la base flexible de la lámpara.

MÁX 40 VATIOS

22

Componenti:

Istruzioni di montaggio:

1.

Assemblare la base formando un cilindro con sette lati e lasciando la superficie opaca all'esterno.

2.

Piegare i 7 elementi paralume contraddistinti dal numero "2" come mostrato in figura. Piegare con cura il lato curvo dell'elemento paralume.

Piegare le "linguette" all'interno lasciando il lato opaco all'esterno.

normann

C O P E N H A G E N

23

3.

Fissare l'elemento paralume al lato stretto dell'apertura dell'elemento base.

Capovolgere l'elemento base e guidare le "linguette" all'interno delle fessure, piegandole poi sul retro per fissare il modulo.

4.

Appoggiare un altro elemento paralume alla base, accanto al primo. Quindi procedere nello stesso modo al montaggio del resto dei 7 elementi paralume "2". Non dimenticare di fissare i moduli all'interno della base.

5.

Prendere l'elemento ad anello contraddistinto dalla lettera "S" e piegare i bordi di rinforzo. Montare l'elemento ad anello servendosi delle "linguette".

6.

Inserire l'elemento ad anello "S" all'interno delle "linguette" dell'elemento paralume e fissare le "linguette" raddrizzandole.

24

3.

Enganche el elemento de pantalla a la parte estrecha de la abertura del elemento de base.

Ponga el elemento de base boca abajo, haga pasar las pestañas por los agujeros y dóblelas sobre la parte posterior para sujetar el módulo.

4.

Coloque el siguiente elemento de la pantalla sobre la base, junto al primero, y continúe hasta haber montado los siete elementos marcados con el número 2. No olvide sujetar los módulos por el lado interior de la base.

5.

Sujete el elemento circular marcado como S y doble sobre sí mismos los bordes de refuerzo. Monte el elemento circular usando las pestañas.

6.

Monte el elemento circular S sobre las pestañas del elemento de pantalla y sujételos enderezando las pestañas.

25

Inhoud:

1 baselement 7 lampenkap-elementen nr. 2 7 lampenkap-elementen nr. 1 1 ringelement S 1 basismodule 1 hangmodule

Montage-instructies:

1.

Klik het baselement met de matte kant naar buiten in elkaar als een zevenkantige cilinder.

2.

26

3.

Hang het kap-element op de smalle kant van de opening van het basiselement.

Draai het basiselement om en plaats de flapjes door de openingen. Vouw ze aan de achterkant om om de module vast te zetten.

4.

Plaats het volgende kap-element naast het eerste kap-element op het basiselement en ga zo door totdat alle 7 lampenkap-elementen met de markering 2 zijn geplaatst. Zet de modules aan de binnenkant van het basiselement vast.

5.

Neem het ringelement met de markering S en vouw de verstevigingsranden om. Zet het ringelement met behulp van de flapjes in elkaar.

6.

Bevestig ringelement S op de flapjes van het lampenkap-element en zet ze vast door de flapjes recht te buigen.

27

Het correct bevestigde ringelement.

Vouw de 7 lampenkap-elementen met de markering 1. Vouw zorgvuldig langs de kromming van het kap-element. Bevestig het eerste kap-element aan het ringelement door de flapjes door de opening te duwen waar zich ook de andere flapjes bevinden.

Bevestig op dezelfde manier de andere lampenkap-elementen. Vergeet niet de modules aan de achterkant vast te zetten.

Buig de basismodule om en zet deze in elkaar met de bevestigingspunten naar binnen.

Plaats de basismodule in de sleuven in de binnenste lampenkap-elementen (de sleuven zijn kleine inkepingen).

De volledig gemonteerde basismodule.

Buig de hangmodule in de zes richtingen en plaats deze als een zevenkantige kegel aan het snoer.

Draai de lamp om zodat de opening aan de bovenkant van de lamp naar boven wijst. Laat de hangmodule in de opening zakken en duw de flapjes door de gaten. Buig de verstevigingsranden horizontaal omlaag om de hangmodule vast te zetten.

De volledig gemonteerde lamp, klaar om op te hangen. U hoeft de lampfitting niet te verwijderen om de lamp op te hangen. De gloeilamp is eenvoudig te verwisselen via de flexibele onderkant van de lamp.

MAX 40 WATT

28

Componentes:

Instruções de montagem:

1.

“Dobre” a base num cilindro com 7 lados, com a parte mate para fora.

2.

Dobre os 7 elementos do abajur assinalados como “2” conforme se ilustra. Dobre cuidadosamente ao longo do elemento do abajur.

Dobre as “abas” para dentro, com o lado mate para fora.

29

3.

Engate o elemento do abajur na parte estreita da abertura no elemento base.

Vire o elemento base ao contrário e insira as "abas" nos orifícios, dobrando-as na parte de trás para apertar o módulo.

4.

Coloque o elemento seguinte do abajur na base, junto ao primeiro, e continue até que todos os 7 elementos do abajur assinalados como n.º 2 estejam montados. Lembre-se de apertar os módulos no interior da base.

5.

Pegue no elemento do anel assinalado como "S" e dobre as extremidades uma sobre a outra. Instale o elemento do anel usando as "abas".

6.

Insira o elemento do anel "S" nas "abas" do elemento de abajur e aperte-os endireitando as "abas".

30

Elemento do anel correctamente montado.

Dobre os 7 elementos do abajur assinalados como "1". Dobre cuidadosamente sobre a curva do elemento do abajur. Coloque o primeiro elemento do abajur sobre o elemento do anel inserindo as "abas" no orifício em que se encontram as outras "abas".

Monte de forma idêntica os restantes elementos do abajur a toda a volta. Não se esqueça de prender os módulos na parte de trás.

Curve e instale o módulo base. Verifique se as juntas estão viradas para dentro.

Insira o módulo base nas ranhuras dos elementos internos do abajur. (As ranhuras são os pequenos cortes).

O módulo base totalmente montado.

Dobre o módulo de suspensão nas 6 partes e instale-o à volta dos fios para formar um cone com 7 lados.

Rode o candeeiro para que a abertura na parte de cima fique virada para cima. Desça o módulo de suspensão e insira as "abas" nos orifícios. Posicione as extremidades horizontalmente para apertarem o módulo de suspensão.

O candeeiro totalmente instalado e pronto para ser suspenso. O candeeiro pode ser suspenso sem retirar a ligação eléctrica. As lâmpadas podem ser trocadas facilmente através da base flexível do candeeiro.

内容:

ベース エレメント 1個

ランプシェード エレメント (no. 2) 7個

ランプシェード エレメント (no. 1) 7個

リング エレメント S 1個

ベース モジュール 1個

サスペンション モジュール 1個

組み立て方:

1.

マット面を外側にして、ベースエレメントを「パチッ」と音がするまではめ込みます。

- ❗ 使用中に異臭や異常が感じられた場合、すぐに使用をやめ、電球が本体に接触していないか確認してください。
- 電球の交換は電源を切ってから行ってください。
- つりさげた状態で、本体を揺らしたり持ち上げたりしないでください。
- 本製品はプラスチック製でできているため、使用頻度や年月により硬化しますので、折り曲げ部分が弱くなる場合があります。
- 白熱球をご使用になりますと、土台部分に熱を持ち、パーツが変形したり火災の原因となります。危険ですので、必ずE26口金13W以下の蛍光灯をご使用ください。上記以外の電球を使用時に起きた不具合につきましては、対応いたしかねますので、予めご了承ください。

2.
